10. (new) A method of lowering accumulated liquid saturation surrounding the wellbore of a gas well comprising:
providing a gas well having a wellbore, said gas well having accumulated liquid saturation surrounding the wellbore, said liquid reducing flow rates of the gas;

inducing a rapid decrease in flowing pressure into said gas well, thereby causing liquid surrounding the wellbore to be dislodged; and

removing said dislodged liquid from the wellbore by swabbing.

11. (new) The method according to claim 10 wherein flowing pressure is decreased by attaching a compressor to a well or group of wells.

12. (new) The method according to claim 10 wherein flowing pressure is decreased by opening the flow from a well or group of wells to the

atmosphere.

13. (new) The method according to claim 10 wherein the gas well has been fracture stimulated.

14. (new) The method according to claim 10 including repeating the rapid decrease in pressure and liquid removal until no further liquid accumulates in the wellbore.

15. (new) The method according to claim 10 wherein the liquid is hydrocarbon liquids or oil.

16. (new) The method according to claim 10 wherein the liquid is water.

17. (new) A method of lowering accumulated liquid saturation surrounding the wellbore of a gas well comprising:

providing a gas well having a wellbore, said gas well having accumulated liquid saturation surrounding the wellbore, said liquid reducing flow rates of the gas;

inducing a rapid decrease in flowing pressure into said gas well, thereby causing liquid surrounding the wellbore to be dislodged; and

removing said dislodged liquid from the wellbore with coil tubing.

18. (new) The method according to claim 17 wherein flowing pressure is decreased by attaching a compressor to a well or group of wells.

19. (new) The method according to claim 17 wherein flowing pressure is decreased by opening the flow from a well or group of wells to the atmosphere.

20. (new) The method according to claim 17 wherein the gas well has been fracture stimulated.

21. (new) The method according to claim 17 including repeating the rapid decrease in pressure and liquid removal until no further liquid accumulates in the wellbore.

22. (new) The method according to claim 17 wherein the liquid is hydrocarbon liquids or oil.

23. (new) The method according to claim 17 wherein the liquid is water.
